EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 14, line 1, the number "1" has been deleted and the number -- 13 -- has been inserted.

The following is an examiner's statement of reasons for allowance: The prior art teaches an elastic member, a front retainer, a drive shaft, a drive shaft bearing and a rear retainer; however the prior art fails to teach "a motor isolation span that spans the length of said elastic member and rigidly retains said front retainer near a forward terminus and said rear retainer near an opposing rearward terminus to restrain compressive and torsional forces created by said elastic member during said storing of said potential energy and said release as rotational kinetic energy."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
